

PATENT

GLASS-CERAMIC PLATE AND ITS MANUFACTURING PROCESS

Filed by: EUROKERA S.N.C.

ABSTRACT

The present invention relates to a glass-ceramic plate, intended notably to cover heating elements, and having at least one opening located within a local deformation of the plate, this opening being at a location other than a heating area and/or having at least one dimension greater than 10 cm and/or an angular and/or complex shape.

The invention also relates to the process for manufacturing the plate and to the cooking appliance comprising said plate.
